The Human Resources Manager
Acacia School
Nakatindi Road, Livingstone, Zambia

RE: APPLICATION FOR THE POSITION OF ICT TEACHER / ACADEMIC COORDINATOR

Dear Sir/Madam,

I am writing to express my strong interest in the position of ICT Teacher / Academic Coordinator at Acacia School. I hold a Bachelor's Degree in Computer Science, a Certificate in Project Management, and have nearly five years of professional experience in education and technology, including extensive experience working within international school environments.

I am particularly drawn to Acacia School because of its commitment to combining the Cambridge Curriculum with the Zambian National Curriculum to provide learners with a balanced, innovative, and globally relevant education. Through my current work, I have experience working with and operating within the Oxford Curriculum, and as a member of ISAZ (International Schools Association of Zambia) and (AIEC), Africa International Education Center, I have developed a strong appreciation for international education standards and collaborative learning environments. This connection to the international education community strongly motivates my interest in becoming part of Acacia School.

My international-school experience began through my work with Algorithmics International School of Programming, which opened opportunities for me to deliver extracurricular ICT and coding programs at various international schools, including Lusaka International School and Pestalozzi Education Centre, among others. These opportunities have strengthened my ability to work with learners from diverse backgrounds and adapt my teaching approaches to different educational environments.

I currently work at Learning Ladder International School and Anvil Coding Academy, where I serve as an Academic Coordinator. My responsibilities include coordinating instructors, overseeing lesson delivery, supporting curriculum planning, organizing educational tours and student activities, and developing partnerships with external institutions. I also have practical experience teaching coding, robotics, artificial intelligence, game development, web development, and digital literacy.

Thank you for considering my application. I look forward to hearing from you.

Yours faithfully,
Mwango Kambayenda
